% SUMMARY
% =====
Summary
Highly motivated and results-driven Software Engineer with 3+ years of experience specializing
in building robust, scalable backend services using Python and FastAPI. Proven ability to
design and implement efficient RESTful APIs, optimize database queries (SQL), and deliver full-
cycle solutions. Seeking to leverage expertise in modern web frameworks to contribute
immediately to challenging engineering roles.
% =====
% SKILLS
% =====
Skills
Languages: Python (Advanced), SQL, JavaScript, Bash
Frameworks/Libraries: FastAPI, Django, Flask, Pydantic, SQLAlchemy, Requests
Databases: PostgreSQL, MySQL, SQLite
Tools/DevOps: Git, Docker, REST APIs, Unit Testing (pytest), AWS/Cloud Services

Experience
Software DeveloperTech Innovations Corp2022 ? PresentRemote
- Designed and developed high-performance microservices using FastAPI and Python, handling over
10,000 requests daily with 99.9% uptime.
- Optimized complex database interactions by refactoring inefficient SQL queries in PostgreSQL,
resulting in a 30% reduction in average API response time.
- Implemented robust authentication and authorization layers (JWT) for critical endpoints,
enhancing system security and compliance.
- Developed automated unit and integration tests using pytest, improving code coverage across
core services from 65% to 90%.
- Collaborated with cross-functional teams to define API specifications and deploy scalable
