Summary
Highly motivated AI/ML Engineer and Full-Stack Developer with hands-on experience building end-
to-end ML pipelines, production REST APIs, and real-time distributed systems. Proficient in
Python and advanced frameworks including PyTorch, TensorFlow, and XGBoost. Proven ability to
implement complex systems like RAG architectures and secure LLM layers. Seeking an AI/ML
Engineering internship to leverage expertise in deep learning, backend development, and open-
source leadership.
% =====
Technical Skills
[leftmargin=*, itemsep=2pt, parsep=0pt]
- AI/ML Frameworks: PyTorch, TensorFlow, Scikit-learn, XGBoost, LightGBM, NLP, Prompt
Engineering, Feature Engineering, AutoML.
- Languages: Python (Expert), Java, JavaScript (ES6+).
- Backend/Web: FastAPI, REST APIs, Node.js, Microservices, WebRTC, API Architecture.
- Data & Databases: Pandas, NumPy, SQL, MongoDB, Vector Databases (Pinecone/Chroma), ETL
Pipelines.
- Infrastructure: AWS, Docker, Kubernetes, Linux, CI/CD, Serverless Computing.
- CS Fundamentals: Data Structures, Algorithms, OOP, Distributed Systems, System Design.
% =====
Experience
AI / ML Engineering Intern May 2025 ? Jul 2025
ANNAM.AI (IIT Ropar)
[leftmargin=*, itemsep=1pt]
- Built end-to-end ML pipelines (preprocessing, feature engineering, training, evaluation)
using Python and Pandas, reducing model iteration time by 50%.
- Trained and optimized XGBoost and LightGBM gradient boosting models for agricultural
intelligence, achieving 87%+ prediction accuracy on crop yield forecasting datasets.
- Implemented robust data validation and feature scaling techniques, ensuring model reliability
across diverse datasets.
AI & Backend Engineering Intern Oct 2025 ? Dec 2025
Analytix4t Lab Pvt Ltd
[leftmargin=*, itemsep=1pt]
- Designed and deployed 10+ production REST APIs using Node.js, optimizing response latency via
connection pooling and advanced query optimization.
- Integrated distributed microservices architecture, enabling low-latency, real-time enterprise
data processing across concurrent multitenant workloads.
- Developed backend services utilizing SQL databases, managing data flow and ensuring
transactional integrity for financial analytics.
